

What is an Encrypted Dollar Coin ECD and What are their plans?

Encrypted Dollar Coin or EDollar Coin (ECD) is a cryptocurrency firm focusing on bringing an advanced currency that is going to be used in every field letting users trade or buy or sell without having to pay any transaction fees at lightning speed while staying anonymous.

Encrypted Dollar Coin is completely a non profit organization when it comes to selling the coins, the only way ECD will be generating revenue is by partnering up with other organisations that will support and encourage the trade and use of ECDs, which is basically when ECD will begin Phase 2 and Phase 3.

The roadmap for Encrypted Dollar Coin is as shown below (Also Check the image for better understanding)

The plan is set to be in 3 parts, or phases

- 1: Phase 1 : Pre Sale
- 2: Phase 2: ICO
- 3: Phase 3: Future

Phase 1: Pre Sale

Pre Sale stage is the first stage of the currency's plan to advance into the market, During this stage users are needed to have a referral code or an invite code to join the system, Once the users have joined the network, they will be given a referral code of their own to invite the other members.

In this stage, the users essentially can buy as many ECDs as they would want at a fixed rate and can create their own networks to which they could invite other users earning them bounty ECDs that they can withdraw as USD if they would want.

Although the wallets are encrypted, the users will not be able to trade ECDs amongst each other till the Phase 2 begins.

Phase 2: ICO

ICO stage is when the users can start the ECDs they have earned or bought to trade with each other, sell or buy goods and services. By the time Phase 2 commences, ECD will partner up with many well renowned firms in Entertainment, Media, Business, Educational, Health, Clothing, Dining, Shopping, Grocery Fields. Users will have the freedom to use ECDs instead of their regular currencies, turning the society cashless.

Users will also be able to send ECDs to each other anywhere in the world at no transaction fees instantaneously while remaining anonymous, as all the transactions will be anonymous.

However when Phase 2 starts, the referral system and withdrawal of USDs will end.

Phase 3: Future

Future stage is when the users can use their ECDs to invest in firms in exchange for stocks, Users can start generating revenue by their investments, helping everyone have extra income

while being part of an ecosystem that is convenient in every way.

Users have full access to the details of their investments, and users get to pick what businesses they want to invest in, Many startups will be supported by ECD investors.
